

Who is BELLMONT?

Bellmont Cabinet Co. is a family-owned cabinet manufacturer, located in Sumner, Washington, dedicated to product innovation, functionality, and timeless & trend setting styles. Our three decade journey has taken us from very humble beginnings to being recognized as one of the finest cabinet manufacturers in the United States.

We pride ourselves on building the highest quality frameless cabinet on the market, featuring greater interior storage capacity, unobstructed openings, and wider drawers with the clean crisp look of flush-fitting full-overlay doors and drawers.

But we build much more than just cabinets.

We want to leave the world a better place, building integrity, respect and responsibly as stewards of our community and environment.

- * Environmental Stewardship Program certified through the Kitchen Cabinet Manufacturers Association (KCMA)
- * National Kitchen & Bath Association member for 25yrs

Checkout out our many 5 STAR Reviews on Houzz and Google and our A rating with the BBB.

Smart, innovative design allows you to meet budget boundaries without compromising personal style or construction quality.

The beauty of strength and versatility combined with affordable custom capabilities, allowing form and function to live in harmony.

Italian influenced design with a simple linear rail system, provides a continuous "no handle" appearance uninterrupted by door or drawer hardware providing a sleek space with contrasting finishes.

- All concealed glue and dowel joinery
- Full top on base cabinets
- White melamine interior std.
- Birch dovetailed drawer, soft close, -full-X, soft close hinges are standard
- Solid color PVC edge banding on boxes is standard

Medium density fiberboard (MDF) is a high grade, composite material that performs better than solid wood in many areas. Made from recycled wood fibers and resin, MDF is machine dried and pressed to produce dense, stable sheets. MDF outperforms solid wood and stands up better to heat and humidity.

Shelves are $\frac{3}{4}$ ", full-depth, and set on steel shelf pins.

Roll outs are optional

Cabinets can be ordered with integral toe kick, or no toe kick; at no price change.

FRAMELESS CABINETRY

WHAT IS FRAMELESS CABINETRY?

Frameless cabinet construction is a European way of manufacturing cabinets that has become popular among American homeowners seeking simple, more contemporary cabinet designs. Frameless cabinetry is sometimes called "full access" cabinetry because it offers greater accessibility by eliminating the face frame. Instead, it relies on thicker box construction for stability. Only full overlay doors can be used, with hinges attached directly to the sides of the cabinet box.

WHAT ARE THE ADVANTAGES OF FRAMELESS CABINETRY?

In Frameless construction, cabinets do not have a face frame attached to the front of the cabinet box. After they have been installed, all you will see are the flat door and drawer fronts, providing a sleek, simple aesthetic that can work with many design themes throughout the home.

Frameless cabinets do not have a center stile coming down in the middle of the two cabinet doors, providing easier access to the items inside, as well as more storage space to work with. The shelves are typically adjustable. Drawers in frameless cabinetry also tend to be larger because of the space saved by not having a face frame attached to the front.

Edge banding details

Finished end banding matches door material and finish on wood doors.

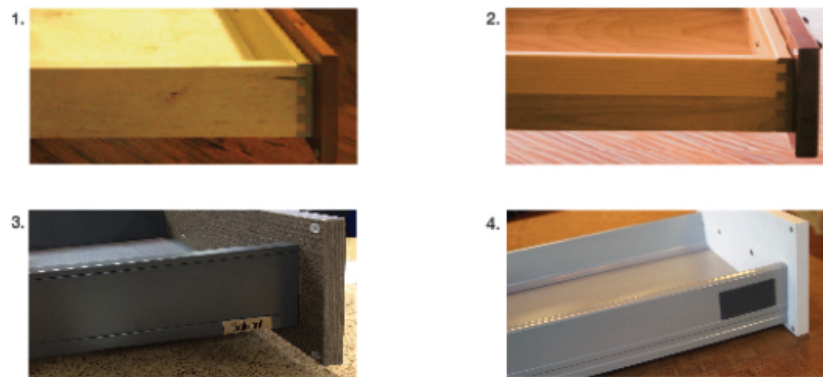

Complimentary PVC banding.

Finished end banding matches door edge on many laminate style doors; see details on door style page.

Interior shelf banding matches box interior.

NO UPCHARGE DRAWER SELECTIONS

Doors really drive the design due to details and design parameters

Go over door style page details prior to finalizing designs; will keep you out of trouble

Door section divided into-

- Finishes
- Wood and Paint doors
- Wood Veneer doors (flat panel, all veneers including Ultima)
- Laminated doors (HP laminate, melamine)
- Foil and Acrylic doors
- Glass Door

Wood Finishes:

Standard stains:

- spray stains.
- spray and wipe stains.

Premium Stains:

- spray and wipe stains.
- two color component stains.

Seal/Top Coat:

- two layers each side with
scuff sanding between.

Wood Finishes:

Glazing is:

- Hand applied – no two exactly alike.
- Front surface only – show customer.
- Best done on doors with more detailing.
- Sealed with clear top coat

Bellmont 1900 offers these as the standard woods:
Alder, Rustic Alder, Cherry, Maple, and Red Oak.

In addition to the standards, we offer these as
Specialty Woods: Walnut, Sapele, Rustic Hickory,
Bamboo, Quarter Sawn White Oak, and Rift Cut
White Oak

Paint Finish:

- Can be applied to MDF 5 piece constructed door, or Wood frame & MDF center panel door, must choose.
- Glazing option available,
- All paint finishes are 5% sheen level; 20% satin
- Box banding is PVC as standard; painted wood veneer banding

Heirloom Finish:

- Base color is paint finish, uses same painting processes as paint finish doors.
- Order on either all MDF constructed, or Wood/MDF combination construction.
- Five colorings.
- Processes is similar to glazing, but not the heavy build up in corners.
- Produces a dry brush effect.
- More custom look than glaze over paint
- Detailed traditional door styles are best.
